

Glenview
HAUS™
Custom Doors & Cabinets Since 2006.

Custom Doors & Cabinets Since 2006.

A door is more than just an entryway. It is the gateway to your home, the threshold where design meets functionality, and where first impressions are made.

At Glenview Haus, we specialize in curating and providing the finest in architectural design. From luxurious entry doors and elegant interior doors to custom steel and aluminum windows, garage doors, and bespoke cabinetry, our showroom showcases an unparalleled selection of premium products.

We strive to provide not just products, but enduring solutions that transform your spaces into timeless works of art.

A modern wooden entry door with a herringbone pattern and vertical glass panels, set against a misty mountain landscape at sunrise. The door is dark brown with a light-colored herringbone pattern. It has two vertical glass panels on either side, framed in black. The handle is a long, thin black bar. The background is a misty mountain landscape at sunrise, with a body of water in the foreground reflecting the sky and mountains. The sky is a mix of blue and orange, and the mountains are covered in green grass and trees. The water is calm, reflecting the sky and mountains. The overall mood is peaceful and serene.

ENTRY DOORS

Front doors create the home's first impression. Clients want front doors that are stylish, welcoming, and reflect the individuals who live inside. Glenview Haus provides multiple styles of made-to-order wood doors.

Mahogany veneer protected with a unique two-component finishing system for unparalleled hardness, outstanding scratch resistance and UV protection.

Reinforced LVL construction with opposing grain anchors the design. This exceptional density increases sound and thermal insulation levels.

EuroTech™ creates an impressive 2 3/4 inch thickness, compared to a standard 1 3/4 wood door.

Extruded polyurethane rigid foam core, for high-compressive strength and superior insulation, provides twice the thermal conductivity.

Metal U bar runs top to bottom on each side in sheeted layers to prevent bowing and warping.

Plywood, with aluminum sheets sandwiched in between, strengthens stability and ensures resistance to moisture absorption and decay.

Solid-beveled edge creates the tightest seal, preventing moisture leaks and drafts, making this the most energy-efficient wood door ever built.

2 3/4"

HARDWARE

We are here to help
you close

- 1** We can select hardware to perfectly complement your door
- 2** We order everything to ensure your hardware arrives exactly as needed

- 4** Door arrives complete and ready for a seamless installation
- 5** Reduce stress and decision fatigue with the help of our product experts

Unmistakable Modern & Traditional Doors

Durability

Everything about our Euro Tech construction is design to make our doors more stable.

Minimal Maintenance

The upkeep for a door with Euro Tech is similar to a fiberglass door, regular UV protection and occasional adjustments.

Insulation

The extra thick stiles and rails and foam core panels, keeps the interior temperature comfortable regardless of exterior temps.

Oversized Designs

Euro Tech construction makes a door highly warp-resistant.

Designed to Perform
Glenview Pivot Doors

EuroTech+

everything you know about EuroTech but we made it 3-½" thick

Double rabbeted jamb

construction preventing air and water infiltration

Extra weatherstripping

at top and bottom so air and water don't stand a chance

Frisjurgens pivot hinge

the best and that's why its all we use

Multipoint lock

a vault like seal and safety

Groundbreaking Aluminum Shielding

An outlandish take on Aluminum clad that no one else matches

½" of SOLID aluminum fastened to the exterior side of the door

Powder coated in many colors and textures

Available with all our hinge options so sizing and pricing can fit your customers' needs

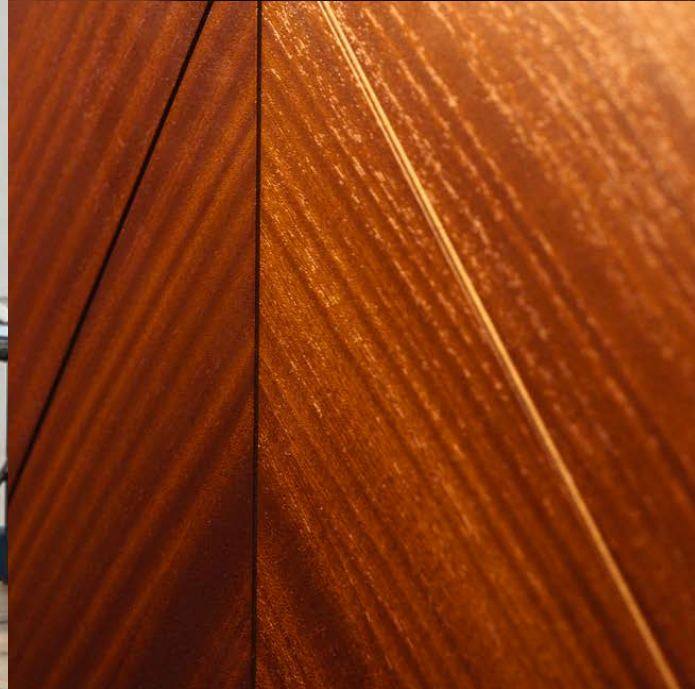

INTERIOR DOORS

Beautiful Interior Doors: Made to Order

The Glenview Haus Collection of Custom Interior Doors shows consummate craftsmanship, intricate details, and hand-applied multi-step finishes of our artisans to your engineered specifications. Our interior doors reflect the variety of styles that coordinate with our front doors.

Interior Doors Ecoline

Sustainable Design & High-Quality Materials

Ecoline doors by Glenview Haus feature eco-friendly, synthetic veneers, offering both style and sustainability.

Cost Effective & Functional

These doors include concealed hinges, magnetic locks, and options for inlays and glass inserts, providing a sleek, modern appearance with versatile design choices.

Versatile Swing Styles

Available in swing, barn, sliding, and pocket configurations, Ecoline doors offer flexible installation options to suit a variety of interior spaces.

Interior Doors Luxeline

Fully Customizable Design

Luxeline doors are designed to be more than just functional; they are tailored to your unique style, offering a personalized touch to your home.

Versatile Functionality

With a variety of swing options—swing, barn, sliding, pocket, and bi-fold—Luxeline doors provide flexible solutions for any interior.

Stylish & Statement-Making

Luxeline doors combine sophisticated design with practical function, creating a striking focal point in any room.

Interior Doors Steel & Glass

Premium Craftsmanship

Steel & Glass doors feature the best profiles from Switzerland, welded with attention to detail, ensuring exceptional quality and precision.

Quick-Ship or Custom Options

Choose from luxury quick-ship doors or fully custom designs made to your exact specifications.

Durable & Versatile

With a powder-coated finish and zinc underlay, these doors are built for durability, offering various swing options including standard, pivot, barn, pocket, sliding, bi-fold, and fixed configurations.

Interior Doors TRUSTILE

Innovative MDF Construction

TruStile pioneered the use of super-refined MDF for painted doors, offering a smoother finish and superior durability compared to natural wood.

Authentic Stile and Rail Design

Every TruStile door is made with true stile and rail construction, ensuring architectural accuracy and avoiding routed or stamped methods.

Sustainable & Customizable

Made to order in any size or style, TruStile doors are engineered for stability, are third-party certified for recycled content, and are more affordable than wood alternatives

WINDOWS + DOORS

INICIO Collection

Glenview Haus proudly welcomes INICIO Aluminum and Steel Exterior Doors by Glenview Doors, where European artistry merges seamlessly with contemporary American elegance, redefining living spaces with doors that are visually striking and engineered for exceptional performance and energy efficiency.

INICIO Construction ALUMINUM

European Craftsmanship & Design

INICIO Aluminum Windows + Doors are expertly engineered and crafted in Europe, ensuring unparalleled fit and finish

Thermally Broken Profiles for Efficiency

Thermally broken profiles, offer superior insulation

Rugged & Rigid Construction

Profiles are 0.0625" - 0.09375" thick, ensuring a strong, square, and durable product

Sustainably Sourced Materials

Over 65% of INICIO profiles are made from recycled aluminum, promoting sustainability in every design

INICIO Construction STEEL

High-Quality Steel Profiles

INCIO Steel exterior doors feature premium profiles crafted by Ottostumm, a renowned Italian and Swiss manufacturer of steel and bronze materials.

Material Options

Available in a range of finishes, including bronze, galvanized steel, corten steel, and stainless steel, offering both durability and style for any exterior.

Durable Finish

The configuration includes galvanized steel with a zinc primer and a powder coating for enhanced protection against the elements.
